An ambition to be shared

This year we want to take a new look on our achievements, with an ambition to move forward. And the key goal is to move forward towards a sustainable future. As a business, we want to be a part of the solution to the climate change crisis and contribute to a more sustainable and resilient society. This is why we are focusing on three main areas: reducing our carbon footprint, improving our water management practices, and increasing our use of renewable energy sources.

In the past year, we have made significant progress towards our goals. We have reduced our carbon emissions by 15% and increased our use of renewable energy by 20%. We have also implemented new water management practices that have reduced our water consumption by 10%.

Looking towards the future, we remain committed to our mission of creating a sustainable and resilient future. We will continue to work hard to achieve our goals and to contribute to a brighter, more sustainable future for all.
In 2015, AGRISUD is present in 18 countries in 4 continents.

Many partners, over the south and the north.

Dedicated expert teams on our operation fields.

Economic, social and environmental results, tangible and recognized.

Financial transparency and rigorous management.
